

Aryan Gupta

Power Platform Developer

📍 Bareilly(UP),India , 📞 +91 7906463308, ✉ thearyangupta007@gmail.com

Professional Summary

Experienced Power Platform Developer with 3 years of expertise in Power Apps (Canvas and Model-Driven Apps), Power Automate, Power BI, SQL, Dataverse, and SharePoint, delivering innovative solutions to enhance business processes. Proficient in system documentation, relational databases, and troubleshooting customer issues, with strong problem-solving, analytical, and collaboration skills to drive impactful results in information technology environments.

Education

-Bachelor of Technology (B.Tech.)

GB Pant Govt. Engineering College, New Delhi

CGPA: 8.03

Work History

-Associate Developer

Cognizant, Gurgaon

February, 2022 - Current

- Successfully designed and developed Power Apps solutions to business problems through the creation of **over 10** innovative **Canvas Apps**, improving workflows and user satisfaction by 35%.
- Engineered and deployed more than **30 Power Automate cloud flows**, automating business processes and integrating systems like SharePoint and Dataverse, reducing manual efforts by 50% and enhancing efficiency.
- Created and maintained multiple **Power BI dashboards**, providing real-time insights into business metrics and driving 50% improvement in data-driven decision-making for cross-functional teams.
- Worked with diverse data sources, including **SQL, Dataverse, SharePoint, and Excel**, to design and implement scalable, efficient solutions tailored to evolving business requirements.
- Led assignments of various complexity, implementing best practices in PowerApps development, and worked as L2 support in one project, where I enhanced preexisting Power App solutions, ensuring smooth operations and user satisfaction.

PROJECTS

-Notify App

Built and implemented an end-to-end Canvas Apps solution integrated with SharePoint lists, automating approval workflows and email notifications through Office 365 connectors, which improved communication efficiency by 40% and reduced manual processing time by 30%.

- Built a project approval system with role-based workflows for managers, directors, and VPs, using Power Automate to add automated timestamping, reminders, and monthly reset, accelerating the approval process by 50%.
- Designed a feature in Canvas app to enable **downloading** the Projects List (gallery) as an **Excel** file with a single button click, leveraging a Power Automate flow to collect Gallery data and populate in the excel file.
- Created a custom Outlook replica within Power Apps using the Office 365 connector, allowing admins to send and customize emails directly from the app.

-Special Events App

Designed and deployed an innovative event management solution using Power Apps, Power Automate, SharePoint, Dataverse, and Power BI, automating workflows and streamlining approval processes, which boosted operational efficiency by 35% and reduced processing time by 25%.

- **Canvas Power App:** Developed dynamic daily and weekly screens for real-time event tracking, allowing approvers to manage next-day and weekly events efficiently and add event-specific details seamlessly.
- **Power Automate Cloud Flows:** Created automated flows, including daily and weekly document generation flow and multiple reminder flows, ensuring timely approvals and document delivery, reducing manual workload by **50%**.
- **Power BI:** Designed an interactive dashboard to monitor event performance metrics, providing actionable insights and enhancing reporting accuracy by **30%** for business stakeholders.

-ServiceNow Integration in PowerBI

Spearheaded an interactive Power BI dashboard for the management team, integrating ServiceNow API data to monitor IT operations and enhance decision-making, achieving a 50% increase in reporting efficiency.

- Enabled real-time analysis of over 10 KPIs across incidents, service requests, and change requests, leveraging advanced data modeling, DAX, and M queries to improve insights and streamline reporting for stakeholders.

Technical Skills

Power Platform Technologies: Power Apps, Power Automate, Power BI, PCF

Foundational Knowledge: Power Apps Creator Kit, Microsoft Dynamics 365, Power Pages, Power Virtual Agent, Azure.

Languages: HTML, CSS, JavaScript, jQuery

Cloud/Databases: SharePoint, Dataverse, MongoDB, SQL.

Certification

-Microsoft Certified: Power Platform Developer Associate (PL 400)

Verify

-Microsoft Certified: Power Platform App Maker Associate (PL-100)

Verify

-Microsoft Certified: Power BI Data Analyst Associate (PL-300)
