# Aryan Gupta

## Power Platform Developer

📍 Gurgaon, India,   📞 +91 9205662802,   ✉ [iamaryangupta78@gmail.com](mailto:iamaryangupta78@gmail.com)   🔗 LinkedIn

## Professional Summary

Power Platform developer with over three years of experience in Power Apps, Power Automate, Power BI, and Dataverse. Skilled in creating AI-enabled low-code solutions using Azure Document Intelligence, performing enterprise-scale data migrations, and developing applications across multiple No-code/Low-code platforms.

## Education

- **Bachelor of Technology (B.Tech.)**     *CGPA: 8.03*
  *GB Pant Govt. Engineering College, New Delhi*

## Work History

- **Assistant Manager**     *March 2025 - Present*
  *Genpact, Gurgaon*
  – Architected an AI-powered document processing solution using **Decisions.com** and **Azure Document Intelligence**, implementing **custom classification models** to categorize 5 document types and extraction models for automated data capture, reducing manual processing time by 60% through intelligent human-in-the-loop workflows for quality assurance. Also, integrating it with the AWD **API** to fetch documents
  – Led comprehensive **Dataverse** migration for mission-critical audit solution, gathering requirements from stakeholders, aligning technical specifications with business objectives, redesigning data models for optimal performance, implementing advanced security configurations, and making the solution Copilot-ready for future AI agent integration, improving system reliability by 45% without downtime..

- **Associate Developer**     *Feb 2022 – March 2025*
  *Cognizant, Gurgaon*
  – Successfully designed and developed Power Apps solutions to business problems through the creation of **over 10** innovative **Canvas Apps**, improving workflows and user satisfaction by 35%.
  – Engineered and deployed 30+ **Power Automate cloud** flows, integrating SharePoint and Dataverse; led incident reviews to identify failure points and implemented preventive automation, reducing manual efforts by 50%.
  – Created and maintained multiple **Power BI dashboards**, providing real-time insights into business metrics and driving 50% improvement in data-driven decision-making for cross-functional teams.
  – Worked with diverse data sources, including **SQL**, **Dataverse**, **SharePoint**, and **Excel**, to design and implement scalable, efficient solutions tailored to evolving business requirements.

## Projects

- **Indexing Automation**
  *Orchestrated the flow for the review of claim forms by classifying documents, extracting key details, and populating them in AWD, with low-confidence cases routed for manual verification by a human.*
  **Technologies:** *Decisions.com (No-Code Platform), Azure Document Intelligence, Custom AI Models, AWD Integration*
  – Led end-to-end delivery of low-code solutions in Agile environments, conducting sprint planning, code reviews, and deployment to production.
  – Trained and tested custom Azure Document Intelligence models for document classification and data extraction, achieving high accuracy rates across 5 distinct document types through iterative model refinement and validation processes.
  – Implemented human-in-the-loop quality assurance workflows within the orchestration model in Decisions.com, routing low-confidence extractions to manual reviewers while automatically processing high-confidence documents for optimal automation and accuracy.

- **Special Events App**
  *Comprehensive event management solution that automates workflows and approval processes, delivering 35% operational efficiency improvement and 25% processing time reduction.*
  **Technologies:** *Power Apps (Canvas), Power Automate, Power BI, SharePoint, Microsoft Dataverse*
  – Developed dynamic Canvas app with daily/weekly event tracking screens, enabling approvers to efficiently manage upcoming events and seamlessly add event-specific details for streamlined coordination.
  – Created Power Automate flows for document generation, approval workflows, and reminder notifications, reducing manual workload by 50% while ensuring timely approvals and delivery.

## Technical Skills

- **Power Platform Technologies**: Power Apps, Power Automate, Power BI, Copilot Studio
- **Other Technologies:** Azure Document Intelligence, Decisions.com, REST API, n8n
- **Languages:** HTML, CSS, JavaScript, Python
- **Cloud/Databases:** SharePoint, Dataverse, SQL

## Certification

- **Microsoft Certified: Power Platform Developer Associate** (PL 400)     **Verify**
- **Microsoft Certified: Power Platform App Maker Associate** (PL-100)     **Verify**
- **Microsoft Certified: Power BI Data Analyst Associate** (PL-300)     **Verify**
